Western Media Group To Enter Japanese Market With The Medlink VPN

For Immediate Release

ISLANDIA, N.Y./EWORLDWIRE/Sep. 2, 2004 --- Western Media Group Corporation (OTCBB:WMGC) announced today a joint venture agreement with Tokyo Consulting Group ("TCG") as well as MedLink West, Inc. through a newly formed company MedLink FE, Inc. MedLink FE will look to implement the MedLink VPN in the Japanese market, which was granted a MedLink VPN License for the Far East, including but not limited to Japan.

Under the terms of the Agreement, MedLink FE will be opening an office in Tokyo, Japan and develop applications for the Japanese market similar to that offered on the MedLink VPN here in the U.S.

Western Media's President Ray Vuono stated "Japan has the 2nd largest medical market in the world and continues to grow. The growth is a product of several factors, such as increased desire to find cost effective healthcare solutions, a more favorable regulatory and registration environment for foreign medical companies, and a rapidly aging population whose healthcare needs are soaring. These conditions in conjunction with the Japanese markets desire for technological innovative solutions present the MedLink VPN with an extremely exciting opportunity, and allow Western Media the opportunity to participate in the high tech Japanese market first hand."

About Western Media Group Corporation

Western Media Group is a holding company for a systems integration company, K-Rad Consulting LLC, and MedLink, USA Inc. and MedLink VPN Inc. (collectively ``Med-Link"). Med-Link's principal product is the MedLink VPN. The MedLink VPN is a virtual private network which allows subscribing doctors and others to securely communicate and to remotely access and retrieve patient records, lab results, X-Rays, CAT Scans and other information.
