

State Of Arizona Adopts Landport's Internet Driven Facility Management System

Landport fully automates facility and property management for statewide operations

For Immediate Release

PHOENIX/EWORLDWIRE/June 27, 2005 --- The State of Arizona has selected Landport's online facility management system to manage all facilities, equipment and property for the State Department of Economic Security. The State of Arizona has completed Landport deployment and is now fully operational.

Landport Systems, Inc. is the global leader in Internet Driven(R) Facility Management and Preventive Maintenance Systems for corporate campuses, commercial property portfolios and government entities. Government users include city, county and state governments, as well as the United States Federal government. Landport fully automates all tenant, employee, facility and property manager, owner and service provider communication, enabling extremely fast and efficient resolution of both ad hoc service requests and all preventive maintenance. Using Landport, property managers significantly cut costs and improve service to their constituents.

"The State of Arizona now has the ability to manage a diverse, complex and highly distributed property portfolio," said Jeff Langner, Landport's vice president of sales. "The Department of Economic Security is now able to provide far more valuable services to the people of Arizona, enabling critically important communication virtually anywhere, anytime."

Landport has allowed the State of Arizona to smoothly transition from a manual, time-consuming process to a fully-automated, on-line system. Landport is a highly cost-effective platform for executing daily work order flow, as well as for review and approval of larger projects requiring significant capital expenditure. The State of Arizona chose Landport for its powerful functionality, short learning curve, simplicity and ease of use.

"We are extremely pleased to have the State of Arizona as a valued Landport client," said David George, Landport's president and CEO. "Using Landport, the Department of Economic Security is able to more effectively accomplish its mission, and help ensure that every child, adult, and family in the State of Arizona is safe and economically secure."

About Landport Systems, Inc.

Landport Systems is the world's leading Internet Driven Facility Management and Preventive Maintenance System, fully automating all communication between tenants, employees, facility managers, property owners and service providers. Landport's powerful web-based system helps facilitate ad hoc service requests, scheduled and preventive maintenance requests, instant notification, work order progress reports, electronic building logs, comprehensive operational analysis, asset management, visitor management, resource management and wireless device support. Landport is accessible anywhere 24/7 through any standard web browser, has unlimited scalability and is highly affordable. There is no software to purchase, install or support. Landport enables facility managers to significantly cut costs and dramatically improve service. The company is privately held and based in San Jose, Calif.

About the State of Arizona Department of Economic Security

The State of Arizona Department of Economic Security (DES) was established by the State Legislature in July

1972 by combining the Employment Security Commission, the State Department of Public Welfare, the Division of Vocational Rehabilitation, the State Office of Economic Opportunity, the Apprenticeship Council and the State Office of Manpower Planning. The State Department of Mental Retardation joined the Department in 1974. The purpose in creating the Department was to provide an integration of direct services to people in such a way as to reduce duplication of administrative efforts, services and expenditures. The DES Mission is to promote the safety, well-being, and self-sufficiency of children, adults, and families.
