

Printerm Announces The Successful Implementation Of Secure MICR Solutions With Removable Security Compact Flash Cards

For Immediate Release

WILLIAMSVILLE, N.Y./EWORLDWIRE/Nov. 11, 2005 --- Printerm today announced the successful implementation of Secure MICR Solutions with Removable Security Compact Flash Card for use with mySAP Business Suite solutions for HP/Lexmark/Xerox/Dell Laser Printers. With speeds ranging from 20-55 ppm, and plenty of security options, these versatile printers come complete with everything required for Secure MICR Check Printing.

Printerm's SAP MICR Font solution is compatible with SAP's built in MICR for Jetcaps partners. Printerm's solution now does not require a different Sapscrip from the one built into the SAP print controls and comes complete with MICR E13B Flash Memory, the ability to securely store signatures and logos. Printerm also publishes its own MICR Manual detailing how to specifically print MICR in SAP.
