

ControlScan Certifies WebCommunitySoftware.com As A Safe Shopping Site

In an effort to increase its Internet security, WebCommunitySoftware.com , the leading global software retailer, today announced that it has become certified by ControlScan.

For Immediate Release

MARIETTA, Ga./EWORLDWIRE/April 10, 2006 --- As a measure to increase privacy and security and to prevent hackers and thieves from accessing sensitive information from its customers, WebCommunitySoftware.com hired ControlScan and subscribed to the Corporate Secure Plan. Through its unique process, ControlScan will conduct security tests and audits of WebCommunitySoftware.com and certify the site's security.

"Privacy and security are the main concerns of consumers," says ControlScan President and CEO Richard Stanton. "Consumers want to do business with companies who take privacy and security seriously. By passing the audits associated with the Corporate Secure Plan, WebCommunitySoftware.com's visitors are reassured that this company is committed to protecting their personal and credit card information and providing a safe online shopping experience."

Once a company passes the security process associated with the Corporate Secure Plan, it receives the Hacker Defended, ID Theft Protected, Privacy Protected and Business Background Reviewed certificates. These certificates are renewed daily, allowing WebCommunitySoftware.com's customers to receive independent third-party verification of the site's actual security before they decide to give out sensitive personal data.

About WebCommunitySoftware.com

WebCommunitySoftware.com is global software retailer focused on offering quality software products at more affordable prices. It believes this business focus combined with providing great customer service and state-of-the-art secure online ordering creates a trusting, dependable consumer relationship which ultimately yields a win-win transaction experience for its customer and WebCommunitySoftware.com.

About Controlscan.com

Controlscan.com provides third party verification and services to identify, measure and prioritize security, privacy, quality, accessibility and compliance risks that exist on corporate web properties. Its solutions provide the visibility and control necessary to evaluate a company's Web property risk exposure, and to put processes and procedures in place to effectively implement online governance strategies.
