

Jennings Development Provides Major Web Site Upgrade to Cyber Group Inc. Site

Cyber Group Inc. Site Features Its Outsource/Offshore Engineering Services

For Immediate Release

DALLAS/EWORLDWIRE/April 26, 2007 --- Jennings Development has released and published a major Web site upgrade for Cyber Group, Inc., a software maintenance and product engineering services provider based in Dallas, Texas. The new Web site, '<http://www.cygrp.com>', features a new streamlined, open-look design for accommodating the expanded content being offered through the site, and enabling enhanced visitor access and site use.

In announcing the release of the new Cyber Group site, Christine Jennings, vice president of Jennings Development, commented, "We were retained to undertake the challenge of designing and architecting a more robust site with more features, visitor friendliness and a clearer presentation of Cyber Group's business and services offerings. The primary focus of the new design was on presenting a clear hierarchy for information provision, visitor education and convenience, all of which were concentrated on improving visitor experience and decision making while browsing the site."

According to John Pillow, Cyber Group division vice president, "Our site needed a design that would enable a more complete presentation of our software maintenance and product engineering services, easier access to information on solutions we have delivered, and a brighter and cleaner site layout to appeal to our visitors and customers. Jennings Development met all of our design and site improvement requirements."

As a Web design and development consultancy, Jennings work included industry-related search engine optimization research and analysis based on Cyber Group's target markets, as well as presenting Cyber Group company information in a format that was both search engine-friendly and readable to Web site viewers. Significance was placed on combining valuable SEO techniques with an appealing Web site design.

Jennings Development, L.L.C. is a San Antonio, Texas Web design and application development consulting company that specializes in creative Web-based applications, search engine optimization and development environment auditing services. Jennings Development solutions involve common sense practices and technical know-how for ensuring the successful achievement of client project goals.
