

Liquid Technologies Releases A Freeware XML Development Environment

For Immediate Release

BRADFORD, West Yorkshire United Kingdom/EWORLDWIRE/Oct. 23, 2007 --- Liquid Technologies Ltd (<http://www.liquid-technologies.com>) is pleased to announce the release of its free graphical XML development environment, Liquid XML Studio, as part of the Liquid XML 2008 product line.

Liquid XML 2008 provides a feature-rich set of tools for developers and analysts including an advanced graphical schema editor, an XML editor, a Web Service browser, an XPath query builder, a documentation generator, and integration with the worlds leading XML data binding tool, Liquid XML Data Binder.

Liquid XML Studio 2008 (Freeware)

Liquid XML Studio 2008 is a new graphical XML development environment boasting features usually only seen on products costing hundreds of dollars and sets a new benchmark for high quality Freeware products.

Features include:

- . Graphical XML Schema Editor, displaying all XML Schema Element and Datatype content, split view showing text and graphical representations, context sensitive properties editor.
- . XML Editor, provides auto-complete intellisense, syntax highlighting and validation against a schema.
- . XPath Expression Builder, allows users to quickly construct complex expressions and visualise the results.
- . Web Service Browser, supports interrogating and calling Soap 1.1, Soap 1.2, HTTP GET and HTTP POST services.
- . Documentation Generator that produces an HTML representation of schema.

Liquid XML Data Binder 2008

Liquid XML Data Binder 2008 is the most comprehensive XML Data Binding tool available, reducing development and testing effort, driving down cost and risk.

XML Data Binding is the process of creating a class library from an XML Schema, bridging the gap between source code and XML by binding XML data to objects designed specifically for the data contained in those documents. This allows applications to manipulate data that has been serialized as either XML documents or Fast Infoset documents.

Liquid XML is a mature product, Liquid Technologies have been a leading force in XML data binding since 2001, and is used on many mission critical applications by industry leaders worldwide.

Features include:

- . Simple intuitive code, generating full projects not just a single file seen in competing products.

. Unrivalled support for the W3C XSD standard, handling the most complex of schema, such as ACORD, Financial products Markup Language (FpML 4) and Health Level Seven (HL7) schema.

. Language support for C++, C# .Net, Java, VB .Net & Visual Basic 6.

. Fast Infoset Support in C++, C# and VB .Net.

. Documentation generation specific for your code library.
