

Verisae Extends Technical Partnership Agreement, with Cyber Group

For Immediate Release

DALLAS/EWORLDWIRE/Feb. 22, 2008 --- Cyber Group Inc. of Dallas, Texas, today announced its technical partnership agreement with Verisae, a Web-enabled clean technology software and services company, has been extended for a fifth year.

"Our growth in the energy and sustainability business fits well with our partnership with Cyber Group. The company continues to deliver great service and a very effective way for us to control development costs and increase productivity without compromising quality," said Paul Wickberg, president and COO of Verisae. "Their staff's expertise and experience in the tools we use to develop and enhance our software applications, along with its engineering presence in the U.S. and in India, have provided us with reasons to expand business process outsourcing to them this year. As we grow globally, by providing complex business enterprise management tools to more major retailers and other clients, this becomes more even important to our business."

Verisae, with its global reach to and experience with multi-site retailers, makes it and Cyber Group, with our offices in Dallas and in Delhi, ideal partners. We are proud to continue our relationship to maintain and enhance Verisae's software solutions," said John Pillow, vice president of Cyber Group.

Cyber Group works on the Verisae applications, which are Software as a Service browser-based, Internet/Intranet applications developed in a Java environment to the J2EE specification. This provides for a secure environment that enables rapid development, integration and enhancements to the product without the costs and risks of writing code for each new piece of functionality.

About Verisae

Verisae (<http://www.verisae.com>) is a leading supplier of clean technology software and services with offices in the U.S., in the U.K. and in Asia. Verisae's enterprise energy management and enterprise refrigerant management software are main components for reducing Carbon Footprints for multi-site operators. Software products include: enterprise carbon footprint, enterprise asset management, maintenance management, enterprise energy management, service automation, and electronic payment of service providers. Verisae provides services including energy surveys, demand management analysis and implementation, and consulting to assure an effective implementation of the solutions.

About Cyber Group

Cyber Group Inc. (<http://www.cygrp.com>), celebrating its 10th anniversary, partners with customers to design, develop, maintain, re-engineer and enhance customers' software products, and their embedded electronic control systems and products. Cyber Group's proven processes significantly reduce their customers' time and cost to market. Utilizing U.S.-managed engineering in Delhi, India, with engineering in Dallas, Texas, enables Cyber Group to deliver a virtual 24-hour day - round-the-clock operations that provide time-to-market, life cycle cost and robust design advantages to clients.
