

## Case-mate Introduces the World's First Touch-Through Case

For Immediate Release

ATLANTA/EWORLDWIRE/April 14, 2008 --- Case-mate, makers of innovative accessories for the iPhone, iPod, MacBook, BlackBerry, Treo, and other handheld devices, announces the launch of a revolutionary new case.

The Naked Case, by Case-mate, is the only case that provides full protection of the device, including the screen, while at the same time allowing full touch-through access to the iPhone or iPod Touch.

The patent-pending electrostatic membrane on the front of the case passes electrical pulses through to the device's screen, ensuring that touch controls work flawlessly while in the case. Precise cutouts allow access to all other controls. The solid acrylic protects the device while allowing its true beauty to shine through. The Naked Case is aptly named - it's as if the iPhone or iPod Touch was wearing nothing at all.

The Naked Case is the only case that offers 360 degree protection of the iPhone and iPod Touch. The case is available for order at '<http://www.case-mate.com>'.

Case-mate.com offers a wide selection of innovative cases, holsters, and accessories for iPhones, iPods, MacBooks, BlackBerrys, cell phones, MP3 players, and laptops. Cases are available in a variety of colors and materials. Case-mate products have received stellar reviews from consumers and industry professionals for their perfect combination of style and function.
