## **IQinVision Recording System Requires No Bandwidth, Delivers High-Quality Images**

*Updated products perfect solution for retail, parking lot, gated community applications*

For Immediate Release

SAN JUAN CAPISTRANO , Calif./EWORLDWIRE/March 11, 2009 --- IQinVision ('<http://www.iqeye.com>'), market leader in high-performance megapixel IP security cameras, intelligent network cameras, and IP video recording systems, today announced that the new generation IQrecorder and IQeye Event Recording System (ERS) are now shipping.

IQinVision's latest generation of IQrecorder boasts a completely new intuitive user interface, improved features, and a redesigned engine to provide better performance for the surveillance industry's only on-camera megapixel NVR solution. New features include simultaneous playback and live viewing, flexible scheduling, improved digital zoom on recorded images, full screen viewing, DVD-like controls, and a graphical timelapse search. IQrecorder is ideal for small security equipment applications where simplicity, ease of install, and low total cost of ownership are paramount. Learn more at '<http://www.iqeye.com/index.php/video-recording-software-iqrecorder.html>'.

The IQeye Event Recording System (ERS) is a self-contained High-Definition megapixel network video recorder that uses NO BANDWIDTH to record crisp, clear video-making it perfect for installations where network bandwidth is at a premium. It includes IQinVision's simple and intuitive browser-based IQrecorder on-camera recording and playback software, which requires no client software. IQeye ERS also offers on-camera solid state storage that is tough, reliable, and able to record more than 20,000 events.

The IQeye ERS is Power-over-Ethernet and is available in both indoor and outdoor models. The system is very easy to install and is the perfect product for end users just getting into IP video - simply mount the IP camera, plug it in, power it up, and it is recording motion-based events right out of the box. For small and remote installations where simplicity and low cost installation are key, the IQeye ERS is a very attractive choice. Learn more at '<http://www.iqeye.com/index.php/video-event-recording-system-iqeye-ers.html>'.

"These two products deliver the perfect low-cost, high-performance solution for applications such as retail store security, parking lot surveillance, gated community security, and more," said Paul Bodell, chief marketing officer for IQinVision. "The IQeye ERS is pre-configured to work right out of the box to eliminate the hassles and prohibitive costs small and medium-size end users traditionally encounter with a video recording security system."

### About IQinVision

IQinVision is the world leader in megapixel IP video. Since 1998, IQinVision has been designing, manufacturing, and marketing the IQeye family of high-performance network cameras, intelligent cameras, and network video recording (NVR) systems. Committed to leading the industry with highly-valued products and customer service, IQinVision was first to market with HDTV and megapixel cameras and has received numerous awards from Frost & Sullivan, ST&D, Detektor, IIPSEC, and others. IQeye megapixel network security camera systems are renowned for image quality, stability, and reliability in the most demanding network conditions and environments. The IQeye acts as a stand-alone NVR or integrates with third-party NVR and video analytics software for enterprise-wide deployments. IQinVision products are available as IQeye-brand, private-labeled, or OEM models. IQeye smart camera systems are widely deployed for city center security, property management surveillance, school campus security, retail security, casino surveillance, government security, transportation security, and a number of other industry applications. IQinVision is a privately-held corporation headquartered in San Juan Capistrano, Calif., with regional offices in Lancaster, Pa.,
