

Information Security Firm MicroSolved Releases HoneyPoint Security Server Console 3.00

MicroSolved Inc. announces its latest HoneyPoint Security Server Console 3.00 is available for organizations, featuring faster performance and more detailed reporting.

For Immediate Release

COLUMBUS, Ohio/EWORLDWIRE/Aug. 21, 2009 --- MicroSolved's latest HoneyPoint Security Server Console 3.00 is available for organizations, offering faster performance and more detailed reporting.

HoneyPoint Security Server Console 3.00 provides cleaner performance and stability, superior memory handling, optimized database, and faster, more enhanced reporting. HoneyPoint Security Server Agent will also experience an upgrade and version 3.00 will be available in the Fall. Current users can upgrade via the FTP site or call support for assistance.

"The 3.00 release continues the tradition of evolution for the HoneyPoint family," said Brent Huston, CEO and Security Visionary for MicroSolved. "It clearly reinforces the value and capability of applying bleeding-edge thinking to the information security problem."
